

Browser Requirements

The "e-regulations" system works best with Internet Explorer (IE) 6 SP1 (and higher versions), Mozilla and Netscape. Improvements are underway to allow the website to be better viewed on Apple Macintosh operating systems as well.

Please note that if the security settings on your Internet Explorer browser are set on "high", then the "e-regulations" system will not function properly.

To view your security settings, please select Tools>Internet Options>Security from the menu at the top of your browser. The "medium" setting will allow the cookies and java scripts used by the "e-regulations" system function properly.
